

Hands-On Exercise: Test Your Favorite Website

Instructions:

1. Open Chrome DevTools (F12)
2. Go to "Lighthouse" tab
3. Run audit on any 3 websites (e.g., amazon.com, CNN/BBC, Galala university website) or (Galala, Arizona and Ain Shams universities)

What to Look For:

- Performance Score (0-100)- LCP, FID, CLS values
- Opportunities list (what's slowing the site down?)

Discussion Questions:

- Which site performed best? Why?
- What were the biggest performance issues?
- How would you fix them?

Screenshot your Lighthouse report – submit it during the next lab!

Hands-On Exercise: Quick Challenge

Open Galala university's website. Identify:

1. How many main navigation sections? (Width)
2. What's the deepest page you can find? (Depth)
3. Does it follow the 7 ± 2 rule?

Discuss with a partner:

Would you restructure anything?

Hands-On Exercise: Test Your Favorite Website

Instructions:

1. Open these three websites:
 - amazon.com
 - duolingo.com
 - behance.net
2. With a partner, identify
 - Primary organization pattern
 - Any secondary patterns used
 - Why that pattern fits the site's purpose
3. Share: One insight per pair (whole class discussion during the Lab)

Hands-On Exercise: Audit Galala website navigation

This is how professional UX designers evaluate navigation!

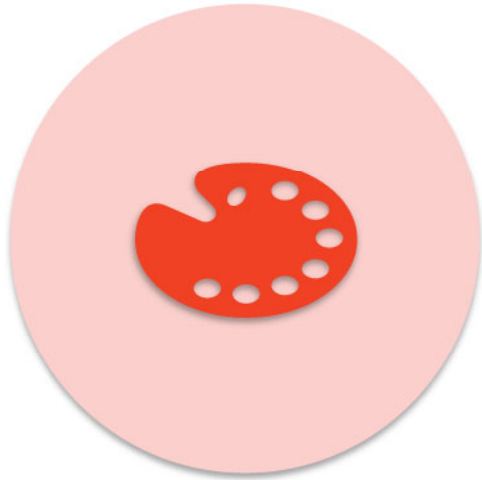

Check for:

1. Consistent placement across pages?
2. Breadcrumbs present?
3. Max 7 ± 2 main navigation items?
4. Keyboard accessible?
5. Mobile-responsive?

Class discussion during the Lab

- Rate: 1-5 stars
- Share what would you improve?

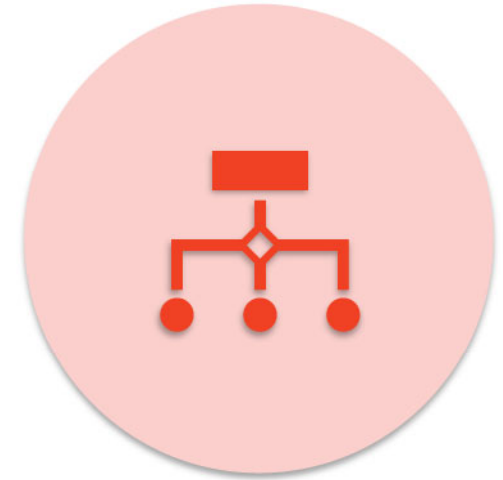

Add Hands-On Activities

Use paletton
to create a color palette, then
explain your choices

Sketch a wireframe
for an e-commerce homepage
for education homepage

Analyze 3 websites:
identify their layout type
(hierarchical/linear/random)
